

SUPERNOVA

DALHOUSIE UNIVERSITY | HALIFAX, NOVA SCOTIA

Deep Dive: Polaris Worksheet

1. Choose your launch location and make some qualitative observations.

Location	Substrate Type	Visibility	Water (fresh/salt)

2. Start video and record sightings on Data Sheet or Worksheet below.

3. Add your observations to SuperNOVA's live data sheet.

4. Choose an animal from Identification Resources that you didn't see. Why do you think these animals weren't found in this habitat?

5. Choose an animal from your list of sightings. Why do you think these animals are well suited to the habitat?
